A,Note: sequence extracted from NCBI backbone (NCBIN:131246, NCBIP:131247)
C,Comment: This protein has many BGF repeats and lin-12[#1172]/Notch repeats.
C,Comment: This protein is one of the neurogenic proteins controlling the decision between
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Omega-conotoxin GVIIB - cone shell (Conus geographus)

NyAlternate names: shaker peptide GVIIB

Sisternate names: shaker peptide GVIIB

Cispecies: Conus geographus (geography cone)

Cispecies: Conus geographus (geography cone)

Cispecies: Day, N.S. Seay, W.S. Zeikus, R.; McIntosh, J.M.; Varga, J.; Rivier, J.; de Santos

Sicience 230, 1338-1343, 1985

A;Title: Peptide neurotoxins from fish-hunting cone snails.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           C;Superfamily: omega-conotoxin

notch-1 protein - mouse

notch-1 protein - mouse

N.Alternate names: motch protein

S.Accession: Mus musculus (house mouse)

C.Species: Mus musculus

C.Species: Mus musculus

C.Species: Musculus

C.Species: Musculus

C.Species: Musculus

A.Reference number: A46019; MUID:93194170; PMID:8449489

A49175

Motch B protein - mouse (fragment)

NyAlternate names: Notch homolog
C;Species: Mus musculus (house mouse)
C;Date: 21-Jan-1994 #sequence revision 05-Jan-1996 #text_change 16-Aug-2004
C;Accession: A49175; PH1570; $\overline{3}32113$

R;Lardelli, M.; Lendahl, U.

Exp. Cell Res. 204, 364-372, 1993
A;Fitle: Motch A and Motch B--two mouse Notch homologues coexpressed in a wide variety of A;Reference number: A49175; MUID:93178563; PMID:8440332

A46836

Ibbropellin C precursor - sea urchin (Strongylocentrotus purpuratus)

N.Alternate names: EGF repeat-containing protein; epidermal growth factor-related protein C,Species: Strongylocentrotus purpuratus (Fuzple urchin)

C,Accession: A48836

R,Bisgrove, B.W.; Raff, R.A.

NyAlternate names: epidermal growth factor homolog precursor
NyAlternate names: epidermal growth factor homolog precursor
NyContains: alternatively spliced fibropellin Ib (EGFI)
C;Species: Strongylocentrotus purpuratus (purple urchin)
C;Date: 13-May-1992 #sequence revision 17-Sep-1997 #text_change 09-Jul-2004
C;Accession: A40136; B40136; G40136; A29316; A43131

A;Title: Primary sequence of duck metallothionein.
A;Reference number: S13154; MUID:91027866; PMID:2223844
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                genera of ducks and their hybrids
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Affitle: Structure and expression of metallothionein gene in ducks.

A;Reference number: JC5094; MUID:97075914; PMID:8918237

A;Accession: JC5095

A;Molecule type: mRNA

A;Residues: 1-63 (LEE>

A;Cross-references: GB:U34231; NID:g1000299; PIDN:AAC60048.1; PID:g1000300

A;Experimental source: strain tsai ya duck
C;Comment: This protein has a high metal binding capacity and sulfur content.
